

Physician referral preparation

A focused clinical summary and existing records can help the team plan an informative evaluation.

INFORMATION TO GATHER

- ☐ Clinical question. Describe the reason for referral and impact on daily function.

- ☐ Diagnosis and evaluation. Summarize the working diagnosis and assessment to date.

- ☐ Treatment history. Include medications and therapies tried, response and adverse effects.

- ☐ Relevant history. Include neuroimaging, operative history and relevant comorbidities.

- ☐ Specialist notes. Provide recent notes from clinicians involved in the patient's care.

- ☐ Prior neuropsychological assessment. Include the report only if already available.

USE EXISTING RECORDS

Do not order new testing solely to complete this checklist. The evaluating team will determine whether additional assessment is needed.

APPOINTMENT SCHEDULING

310-825-5111

Contact the scheduling team for current referral instructions and official, external channels for secure records. Do not send patient records through this personal website.

Record preparation only. Evaluation and treatment candidacy require clinical review.
